6/12/94

Dear Mr. Harrell,

It has taken some time but today Dr. McKnight and I and several others had a chance to look at that treatment of th Zapruder film and it is effective.

He is going to take it to Hood and get a copy made and then we'll return it to you.

I see what you say it shows clearly. You are correct.

It also has several other, probably unintended importances in this treatment.

For one thing JFK is waving until he is obscured by the sign and that is some time, relatively, after the first shot, in Posner's theory.

So again I thank you.

Sincerely,

Harold Weusberg
